

# SUSTAINABLE WORLD BALANCED MODEL PORTFOLIO

30th September 2018

## OBJECTIVE

This portfolio is designed for investors with a moderate risk profile seeking reasonable rates of total return over the long term, some of which will come by way of income. The portfolio provides an actively managed and diversified spread of investments giving access to opportunities across global financial markets. However, while being actively managed in its asset allocation, the portfolio will have a minimum allocation to equities of 40% and a maximum of 70%, together with a minimum allocation to fixed income and cash of 20%. The portfolio is invested in funds managed in a 'responsible', 'sustainable' and/or 'positive impact' manner (collectively 'ethical' funds), providing exposure to fixed income, equity markets and alternative assets.

The portfolio's returns will be shown relative to the IA Mixed Investment 40-85% Shares sector, however it is important to note that this sector consists of funds with greater investment flexibility and structurally different asset allocation guidelines. The portfolio aims to outperform this sector average over the medium term.

## RISK RANGE

Current Hawksmoor  
Risk Score 4.4

On a scale of 1-10, with 1 being low risk and 10 being high risk, Hawksmoor would anticipate the collection of funds within the portfolio to expose an investor to a level of risk in the range of 4-6.

## ASSET EXPOSURE RANGES

Current exposure to equities 58%

The portfolio will have exposure to Equities of between 40% and 70%.

Current exposure to fixed  
income and cash 42%

The portfolio will have a minimum exposure to Fixed Income and Cash of 20%.

## PERFORMANCE

There is insufficient performance data to display. This model portfolio was launched on 16/07/2018.

## PORTFOLIO SUMMARY

During the period since launch we sold Jupiter Ecology and introduced WHEB Sustainability. We sold Premier Ethical and introduced a slightly smaller position in Janus Henderson UK Responsible Income, adding the remainder to our holding in Liontrust Sustainable Future Corporate Bond.

Since inception, the best performing fund has been F&C Responsible Global Equity (+5.9%) and the worst performing fund has been EdenTree Amity UK (-1.7%).

## COMMENTARY

Since inception, Sustainable World Balanced (+1.0%) has performed slightly ahead of its IA Mixed Investment 40-85% Shares sector average (+0.8%) comparator.

Performance has been led by global equity funds in the shape of F&C Responsible Global Equity (+5.9%), Baillie Gifford Positive Change (+5.8%) and Liontrust Sustainable Future Global Growth (+4.8%). A weak period for UK equities, due to concerns over the eventual Brexit deal, is evidenced by our worst performing fund, EdenTree Amity UK (-1.7%). More pleasingly, our corporate bond exposure has held up relatively well in what has been a tough environment for fixed interest assets, led by Liontrust Sustainable Future Corporate Bond (-0.1%) and EdenTree Amity Short Dated Bond (-0.3%).

## RATINGS/AWARDS

*Performance figures and charts sourced from Financial Express Analytics (total return, bid to bid, excluding fund rebates and excluding fees applied by the platform and adviser, but including Hawksmoor's fees without the VAT). These figures refer to the past and past performance is not a reliable indicator of future results.*

## Geographic Breakdown

## Hawksmoor Classification

**Exclusion** – The fund has a comprehensive negative screening process in place covering environmental, social and governance criteria. We have scrutinised the quality of this screening process.

**Integration** – Building on the above, the fund incorporates a positive screening process in search of companies demonstrating positive characteristics and exposed to positive themes.

**Impact** – More specialist in nature, the fund actively seeks companies making a positive impact to the environment and/or to society.
