

DEFENSIVE MODEL PORTFOLIO

31st December 2018

OBJECTIVE

This portfolio is designed for investors who are only prepared to accept very limited risk to capital from investing in financial markets and are therefore more willing to accept a lower return. The portfolio will be actively managed and diversified across global financial markets, however in order to reduce the risk of capital losses, an emphasis will be placed on fixed interest holdings and certain other defensive assets. An important way risk will be limited in the portfolio will be to have a maximum exposure to equities of 35% and minimum allocation to fixed income and cash of 45%. The portfolio is mainly invested in funds managed by highly regarded specialist managers who are experts in a particular field.

The portfolio's returns will be shown relative to the IA Mixed Investment 0-35% Shares Sector, however it is important to note that the Sector consists of funds with greater investment flexibility and have structurally different asset allocation guidelines.

CAUTIOUS MODEL PORTFOLIO

31st December 2018

OBJECTIVE

This portfolio is designed for investors prepared to accept some risk from investing in financial markets, but who are content to target more modest returns in exchange for a lower risk approach. The portfolio provides an actively managed and diversified spread of investments giving access to opportunities across global financial markets. However, while being actively managed in its asset allocation, the portfolio will have a minimum allocation to equities of 20% and a maximum of 50%, together with a minimum allocation to fixed income and cash of 30%. The portfolio is mainly invested in funds managed by highly regarded specialist managers who are experts in a particular field. These funds combine together to provide broad exposure to global markets together with a focus on areas chosen for their potential either to enhance the returns achieved from the portfolio or to lower its overall level of risk.

The portfolio's returns will be shown relative to the IA Mixed Investment 20-60% Shares Sector, however it is important to note that the Sector consists of funds with greater investment flexibility and have structurally different asset allocation guidelines.

RISK RANGE

↓ Current Hawksmoor Risk Score 3.7

On a scale of 1-10, with 1 being low risk and 10 being high risk, Hawksmoor would anticipate the collection of funds within the portfolio to expose an investor to a level of risk in the range of 3-4.

ASSET EXPOSURE RANGES

↓ Current exposure to equities 31%

The portfolio will have exposure to Equities between 20 and 50%.

↓ Current exposure to fixed income and cash 40%

The portfolio will have a minimum exposure to Fixed Income and Cash of 30%.

AGGRESSIVE MODEL PORTFOLIO

31st December 2018

OBJECTIVE

This portfolio is designed for higher risk investors looking to maximise long term returns on their investment from investing in financial markets and who are able to tolerate frequent and sometimes significant fluctuations in the value of their investment in the short term. The portfolio provides an actively managed and diversified spread of investments giving access to opportunities across global financial markets. This unconstrained portfolio will have a high exposure to equities particularly in overseas markets and specialist asset classes that exhibit the best potential for growth over the long term. The portfolio is mainly invested in funds managed by highly regarded specialist managers who are experts in a particular field.

The portfolio's returns will be shown relative to the IA Flexible Investment Sector, however it is important to note that the Sector consists of funds with greater investment flexibility and have structurally different asset allocation guidelines.

DISTRIBUTION MODEL PORTFOLIO

31st December 2018

OBJECTIVE

This portfolio is designed for investors whose priority is to achieve an attractive level of income from their investments and are prepared to accept a moderate level of risk in doing so. However, while being actively managed in its asset allocation, the portfolio will have a minimum allocation to equities of 40% and a maximum of 70%, together with a minimum exposure to fixed income and cash of 20%. We aim for the overall yield on the portfolio to be higher than that available from a composite index of financial assets and we believe a diversified approach to asset allocation will enhance the opportunities to produce an attractive income yield, and offer good prospects for capital growth.

The portfolio's returns will be shown relative to the IA Mixed Investment 40-85% Shares Sector, however it is important to note that the Sector consists of funds with greater investment flexibility and have structurally different asset allocation guidelines.
