

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

The MI Hawksmoor Distribution Fund ("the Fund") B Accumulation Shares

This is a sub fund of MI Hawksmoor Open Ended Investment Company. ISIN: GB00B7L5TW76. Maitland Institutional Services Ltd is the Authorised Corporate Director of the Fund.

Objectives and investment policy

The Fund aims to provide you with income and the potential to grow the amount you originally invested.

The Fund will invest in a range of other investment funds from the United Kingdom as well as authorised offshore funds listed on exchanges worldwide. These will be from a range of fund managers and will include funds such as investment trusts, which offer shares quoted on a stock market.

The assets of these other funds will be UK and global shares, bonds (which are loans that pay a fixed or variable rate of interest issued by companies and governments) and other investments such as property and commodities.

The Fund will gain exposure to property through investment trusts and exposure to commodities through investment funds, exchange traded funds and investment trusts.

The Fund may use derivatives for investment purposes however, this policy is not currently applied and may not be applied without the required 60 day notice to shareholders.

The Fund will adopt an active strategy seeking to take advantage of pricing inefficiencies found in some funds, and from movements in financial markets.

Any income this share class generates will be paid out to you.

You can buy and sell shares on any business day in London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the prospectus.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The Fund is ranked 4 because funds of this type have experienced average rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Fund:
- Investing in other funds may expose investors to increased risk due to less strict regulations and the use of derivatives.
- The price of some funds may not reflect the value of the assets they hold. This can result in wide changes in the share price.
- The other funds can themselves invest in assets such as bonds, company shares, cash and currencies. The objectives and risk profiles of these underlying funds may not be fully in line with those of this Fund.
- Investing overseas can bring additional returns and spread risk to different markets. There are risks, however, that changes in currency exchange rates may cause the value of your investment to decrease and increase.
- Bond values are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may not be able to pay the bond income as promised or could fail to repay the capital amount used to purchase the bond.
- For further risk information please see the prospectus.
