

THE MI HAWKSMOOR VANBRUGH FUND

31st August 2019

FUND INFORMATION

Investment Objective

The investment objective of the Fund is to provide capital growth and income.

Investment Policy

The Fund's portfolio will consist primarily of a diversified range of open and closed ended funds. The portfolio will be actively managed, with the investment manager seeking to take advantage of inefficiencies in the pricing of closed ended funds and significant movements in the financial markets. Through its investments in these collectives, the portfolio will be exposed to a range of asset classes (such as equities, bonds, property and commodities), underlying currencies, geographic spread and funds managed by a variety of fund management groups and style of investment manager.

Investment Outcome

The Fund's primary aim is to deliver returns, after charges, in excess of CPI over the medium term (defined as rolling periods of 3-5 years). In striving to achieve this target, the managers seek to strike the right balance between the need to generate positive real returns and preserve capital by investing in a variety of financial assets which can be volatile. The managers will seek to mitigate against this volatility by ensuring a diversified portfolio of assets, each of which share the common characteristics of a margin of safety and low intra-asset correlations. However, investors may see fluctuation in the value of their investment over the short term, so they need to share the managers' long term perspective in order to increase the likelihood of superior long term total returns. Whilst there is no yield target, the Fund will always contain an allocation to bonds and other income producing assets, so some income generation is likely.
