Cautious (0–40% Equity) portfolios are intended for clients where a degree of equity risk is appropriate through an investment cycle, but where the longer-term preservation of capital is of primary importance. The portfolio will be managed with an asset allocation and risk profile consistent with a Defaqto Risk Profile of 3. You should be looking to invest for at least 3 years. The objective of this portfolio is to provide returns primarily from income.

A central model is created for each of our model portfolios, where the performance summary, asset allocation, fund holdings, charges and yield quoted on this factsheet are based on the central model portfolio. Where the central model is replicated, such as through a platform, any individual portfolio is unlikely to be identical to that of the central model as a result of the timing of the investment or any restrictions of the platform provider. Where a fund is not available on a platform, a suitable alternative is chosen. There may be some circumstances when certain investments (e.g. property funds) may not be readily realisable and investors may experience difficulty in selling the investment or in obtaining reliable information as to its value.

Moderate (40–60% Equity) portfolios are intended for clients seeking returns in excess of inflation, typically with an equity content of close to 50%. These returns are not to the exclusion of the longer-term preservation of capital. The Portfolio value will tend to rise and fall with equity markets, but to a lesser degree. The portfolio will be managed with an asset allocation and risk profile consistent with a Dynamic Planner Fund Risk Profile of 5. You should be looking to invest for at least 5 years. The objective of this portfolio is to provide returns primarily from income.
