

Wellian (HIS) Balanced

As of 30/03/2024

A range of portfolios managed by the Investment Solutions team at Hawksmoor Investment Management, designed in conjunction with Wellian exclusively for their clients.

Objective

The Balanced model aims to provide long term capital growth with some income for investors who are willing to accept a medium to high level of risk by investing across global markets into a range of asset classes. Equity exposure within this portfolio will not exceed 80%. The portfolio's benchmark is the ARC Sterling Steady Growth PCI.

There may be small variations in the yield, costs, and past performance of the portfolio between platforms due to share class and fund availability, and because of the timing of the trading. Performance data sourced from Morningstar (total return, bid to bid, excluding fund rebates). Performance figures excluding fees applied by the platform, adviser, and Hawksmoor. The addition of these fees would have an impact on performance. These figures refer to the past and past performance is not a reliable indicator of future results. A central model is created for each of our model portfolios, where the performance summary, asset allocation, fund holdings, charges and yield quoted on this factsheet are based on the central model portfolio. Where the central model is replicated, such as through a platform, any individual portfolio is unlikely to be identical to that of the central model as a result of the timing of the investment or any restrictions of the platform provider. There may be some circumstances when certain investments (e.g. property funds) may not be readily realisable and investors may experience difficulty in selling the investment or in obtaining reliable information as to its value.

There may be small variations in the holdings and asset allocation of the portfolio between platforms due to share class and fund availability. Where a fund is not available on a platform, a suitable alternative is chosen. There may be some circumstances when certain investments (e.g. property funds) may not be readily realisable and investors may experience difficulty in selling the investment or in obtaining reliable information as to its value. The values may not equal 100 due to rounding.
