

# Wellian (HIS) Conservative Passive

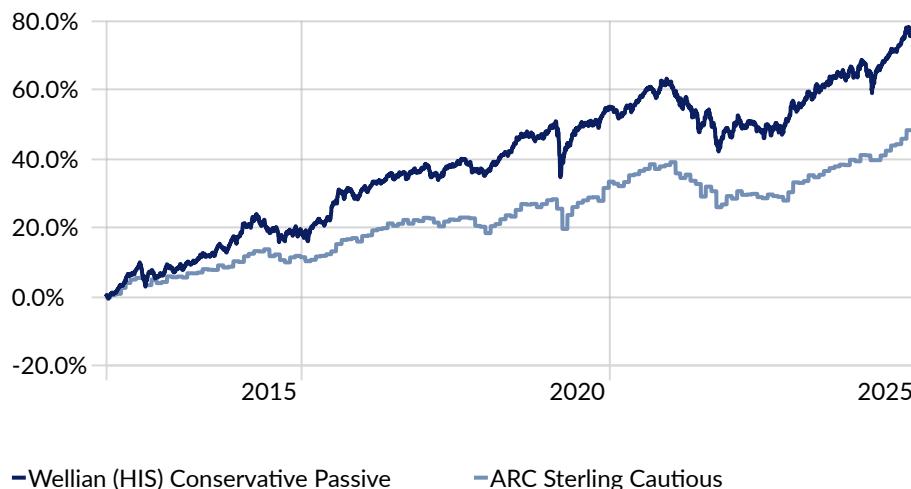

As of 31/12/2025

A range of portfolios designed and managed by the Investment Solutions team at Hawksmoor Investment Management.

## Investment Objective

The Conservative Passive model aims to provide a combination of long term capital growth and an income for investors who are willing to accept a low to medium level of risk by investing across global markets into a range of asset classes using passive funds, although some active funds may be used where we cannot replicate an index. Equity exposure within this portfolio will not exceed 40%. The portfolio's benchmark is the ARC Sterling Cautious PCI.

There may be small variations in the yield, costs, and past performance of the portfolio between platforms due to share class and fund availability, and because of the timing of the trading. Performance data sourced from Morningstar (total return, bid to bid, excluding fund rebates). Performance figures excluding fees applied by the platform, adviser, and Hawksmoor. The addition of these fees would have an impact on performance. These figures refer to the past and past performance is not a reliable indicator of future results.

## Asset Allocation

## Equity Region Exposure Breakdown

There may be small variations in the holdings and asset allocation of the portfolio between platforms due to share class and fund availability. Where a fund is not available on a platform, a suitable alternative is chosen. There may be some circumstances when certain investments (e.g. property funds) may not be readily realisable and investors may experience difficulty in selling the investment or in obtaining reliable information as to its value. The values may not equal 100 due to rounding.
