MEETING YOUR CLIENTS' NEEDS

For many Financial Advisers, the minimum objective for most of their clients is to increase their wealth in real terms over time. This means achieving a positive return after the impact of inflation, costs and charges.

At Hawksmoor, we put this minimum objective at the heart of everything we do. We take the responsibility of managing the wealth entrusted to our care extremely seriously and take great pride in looking after individuals hard earned savings.

We have a highly experienced, award-winning team of four fund managers spending every day scouring the vast investment universe for great ideas to populate the funds. All the fund managers are personally invested in the funds, alongside their families, friends, colleagues, and of course our clients.

We understand the detrimental impact that inflation has on purchasing power over the long term, evidenced in the below chart.

FIGURE 1: HOW DIFFERENT RATES OF INFLATION ERODE PURCHASING POWER

Source: Internal.

That is why the focus on growing wealth in real terms has informed every decision we have made since day one in 2009.

It is the cornerstone of the long-term, consistently successful outcomes we have delivered for all our investors and underpins The Hawksmoor Approach.

THE HAWKSMOOR APPROACH

Hawksmoor's multi asset Funds – Vanbrugh, Distribution and Global Opportunities – all share the same award-winning investment process, founded on the following principles:

- Investing with reference to a benchmark does not enhance the potential of generating positive *absolute* real returns. The Hawksmoor Funds adopt an **unconstrained** approach as a result.
- The risk-return characteristics of asset classes and individual investments are not static calling for a **dynamic** approach to portfolio construction where asset allocation evolves over time
- Forecasting the future is difficult. The team avoid macro predictions, seek to own assets in possession of a **margin of safety** and construct highly **diversified** portfolios.
- The broader the investment universe the greater the probability of finding investments capable of delivering positive real returns. The Hawksmoor Funds invest in equities and bonds, but also a range of **alternative** asset classes, many of which exhibit **low correlation** with mainstream markets
- Idiosyncratic** returns are valuable. The team's expertise in investment trusts provides a source of **differentiated** performance
- Skilful active managers** do exist and can outperform. 400+ research meetings conducted each year to identify the best funds with the most talented fund managers

Actively managed multi asset funds tend to have higher costs compared to passive solutions, yet we can demonstrate the added value that our Funds can offer your clients, in the form of investment opportunities, diversification benefits and potential for better risk-adjusted returns.

BEYOND 60/40

The Hawksmoor Approach with its broad investment universe, significant use of investment trusts, unconstrained asset allocation and valuation conscious process can result in highly differentiated portfolios, offering exposure to investments and sources of return that many multi-asset funds are unable to access.

Source: Hawksmoor Investment Management, MSCI and ICE, 31/12/2025. 40% equities represented by MSCI World All Cap. 60% bonds represented by ICE BofA Global Broad Market Hedge GBP. See MSCI and ICE disclaimers on page 14.

The Funds are dynamically managed with asset allocation evolving through time driven by valuation and relative return prospects rather than with reference to an arbitrary benchmark.

Source: Hawksmoor Investment Management, Vanbrugh Fund, 31/03/2009 to 31/12/2025.

TRULY MULTI-ASSET, TRULY ACTIVE

The Hawksmoor Funds are capacity constrained. Maintaining the integrity of the investment process and ability to replicate past performance are prioritised over asset gathering. Running too much money impacts how quickly portfolios can be repositioned and shrinks the investible universe. Managing a smaller pool of capital allows access to investment trusts and smaller actively managed open-ended funds, both of which have been persistent sources of alpha over the years.

Investment trusts as a source of idiosyncratic returns

- Access to less liquid alternative asset classes
- Trading discount volatility and sector inefficiencies
- Engagement strategies to unlock value

Smaller open-ended funds

- The larger the fund, the greater the probability of average performance
- Smaller funds have a broader opportunity set (ability to go down the market cap spectrum)
- Smaller funds have a liquidity advantage when establishing and exiting positions
- Being able to access smaller open-ended funds increases the pool from which to identify talented managers

BUILDING CLIENT PORTFOLIOS

Our three Funds cater for different risk tolerances and investment objectives and have all delivered excellent risk-adjusted returns in excess of their respective IA sectors since launch. The dynamic, unconstrained approach to portfolio construction makes them suitable **stand-alone investments** that can be held through the cycle.

FIGURE 4: VANBRUGH CONSISTENT OUTPERFORMANCE IN DIFFERENT MARKET CONDITIONS

Source: FE fundinfo, 3 & 5 year rolling performance to quarter end, 31/03/2009 to 31/12/2025.

Hawkmoor’s differentiated investment process and positioning mean our Funds bring significant diversification benefits, complimenting passive and benchmark aware multi-asset funds extremely well. Blending the Hawkmoor Funds with more traditional approaches can result in superior risk adjusted returns

FIGURE 5: INTRODUCING THE HAWKSMOOR FUNDS TO IMPROVE RISK-ADJUSTED RETURNS

Source: FE fundinfo, 18/02/2009 to 31/07/2026. 40/60 balanced portfolio represented by 40% Vanguard Total World Stock ETF and 60% ICE BofA Global Broad Market Hedge GBP. See ICE disclaimers on page 14.

A SOLUTION FOR EVERY CLIENT
